SUMMARY

A Young web3 content marketer/manager strategizing the growth hack for budding and established web3 initiatives using astute knowledge and experience in this space. As a content strategist and Community Manager, officiated and orchestrated some successful IDOs and NFT drops in the last one year. Creating a content marketing strategy with my signature spin to it and ensuring laser sharp execution is something I take pride in. A big-time believer in a personalized approach to marketing and achieving it with the power of storytelling. A true team player, a patient listener, an avid reader, a crafty storyteller and a born leader relentless for innovation and perfection.

Looking forward to contributing to this exciting project by building a solid team that is a content powerhouse and a force to reckon with internally.

EXPERIENCE

CONTENT MARKETING ASSOCIATE AT **BLOCKWIZ.COM**

Provided my content strategy services to Blockwiz, One of the leading Blockchain marketing agency. I was the part of team that executed the content marketing needs of more than a dozen of crypto projects. I was also involved with the internal marketing of Blockwiz.

What we achieved-

1. Created comprehensive blog strategy that pumped the engagement by nearly 300% within 3 months.
2. SM Strategy that ensured a rapid onboarding and community building. Most were done from scratch.
3. Formulated a crisp newsletter plan from clients that had an average open rate of 28.6%

CONTENT STRATEGY CONSULTANT AT **LITHIUM FINANCE**

Joined this exciting DeFi pricing oracle for illiquid assets as a consultant for editorial needs. Some milestones that we hit were-

1. Streamlined the editorial operations from conceptualization to final execution.
2. Planned and created an effective blog strategy calendar to build an online presence on Medium.
3. Helped in building a thriving community on SM, especially Twitter.

EXPERIENCE

CONTENT STRATEGIST AT SUGARBOUNCE

One-of-a-kind web3 project catering to the NSFW and adult entertainment enthusiasts. We had a thumping IDO of \$TIP token. Here are some key strategic moves that were very successful-

1. Strategized a content marketing plan for the upcoming IDO. The pre-IDO campaign included strengthening the awareness of the key Sugar verticals both for the audience and the adult creators. We managed to get massive traction on Medium, Twitter and Instagram.
2. Coordinated product development with the product team based on the community response on all the digital media.
3. Helped in optimizing the website in terms of UI/UX writing that was in accordance with the niche we were targeting. Result- Massive drop in the bounce rate and increase in conversion rate

CONTRIBUTING EDITOR AT KUCOIN EXCHANGE

I was associated with Kucoin Exchange as a Contributing Editor for conceiving long-form content and preparing a content calendar for the Weekly newsletter. My delivery was extremely result-driven. To put it in numbers-

1. Wrote more than 2 dozen long-form well-researched blogs revolving around the in-depth analysis of tokens, Weekly Market movements, new token listings etc. As reported more than half a dozen secured their place in the top trending blogs of the day on the Kucoin website and mobile apps.
2. Conceived the content and the calendar for one of the weekly Newsletters for Kucoin users. The reported open rate was 22%

CONTENT MANAGER AT GAMESTAR EXCHANGE

As an Editor, I was tasked with building a team that can handle the content marketing needs of the project on various digital media from scratch leading to the eventual IDO on various launchpads. Our targeted approach to team building and project marketing led to this:

1. We saw a massive growth of 400% on Medium, Twitter grew by 3x, and Instagram by 2x. The regular visitors engaging with the beta version of the product also went up by massive margins.
2. Our IDO marketing campaign was a massive success, We were able to create a good amount of noise in the crypto community for the \$GMS token to get sold out in 6 hrs.
3. Our content strategy plan to give personalized guidelines to influencers we collaborated with was also a massive success.

EXPERIENCE

CONTENT LEAD AT GLIMPSE

As a content Lead at Glimpse, A decentralized social media platform that enables content creators and influencers to connect and engage with their fan base using NFTs, I was tasked with structuring the content creation and the delivery process in coordination with various departments. Glimpse to some of the achievements there-

1. Helped in optimizing the UI of the website with the best copywriting and SEO practices intended to drive conversion.
2. At an early stage, the project was in want to drive a huge awareness campaign around NFTs and how Glimpse utilizes its effectiveness on the platform. We developed a comprehensive content strategy across the platform that had blogs, SM Posts, Videos, How to's content etc to build awareness and presence in all the spaces.
3. These measured steps reflected in numbers as we show nearly 2x jump in the follower counts on most of the social and digital media platforms.

MARKETING CONSULTANT AT EASY ENERGY FINANCE

Sister company and the Finance wing of US-based public listed company \$DUTV, helped them to set up a robust marketing plan for the newly conceptualized tokenized model they pivoted to. Here are the key strategic moves that prove critical to the final token launch-

1. A mature approach towards overall marketing that pushes for a sustainable initiative led to a high number of interests in the token. We built a digital media presence that was very novel and appealing contrary to the std practice of marketing followed by most companies in this space.
2. I was at the helm that involved creating strategies for newsletters, outreach, blogs, SM campaigns, PRs and drafting proposals.

EDITORIAL EXECUTIVE AT RENEVERSE.IO

A web 3 gaming protocol, for developers and gamers that promises to introduce gamefi features into their portfolio games. As an Editorial Executive, I was at the helm when the protocol was in its nascent phase. I was very closely involved with the founding members of the protocol and played a key role in building the protocol as we know it today. Here are some of the quantifiable results and achievements during my stint-

1. As an Editorial Executive of a project that was being conceptualized, I was closely associated with the key aspects of the protocol like finalizing tokenomics, and brand identity brainstorming.
2. Conceptualized the overall marketing strategy for all the viable digital media with a personalized approach for the developers and the gamers. This was critical and we managed to achieve this with a great degree of success.
3. For Reneverse Genesis NFT Drop, some of my key contributions include but are not limited to conceiving a detailed Background story of the Rene arts, its use cases for holders, the design traits, the entire marketing campaign for the drop and UI writing for the drop page
